

Benefits of Our Air Sanifiers®

Up to 99% Allergens

Don't let allergies win! Air Oasis air purifiers can greatly reduce the amount of mold spores, pet dander, dust mites, and other allergens in your home.

Up to 99% Odors

Get rid of unpleasant smells and breathe easier. Our products can eliminate the volatile organic compounds that cause offensive odors in the home.

Up to 99% Mold

Studies conducted at West Texas A&M University showed that Air Oasis air purifiers can greatly reduce the amount of mold spores in the air.

Up to 99% Germs

Your home could be germ-free! Our air purifiers emit specific wavelengths of ultraviolet light that are effective in killing airborne germs.

No Filter

Air Oasis air purifiers are more efficient in ridding the air of contaminants than a HEPA filter.

Maintenance Free

Air Oasis products are long-lasting and require very little maintenance.

Energy Efficient

Our air purifiers operate on only a fraction of the energy that other products use.

Long Range

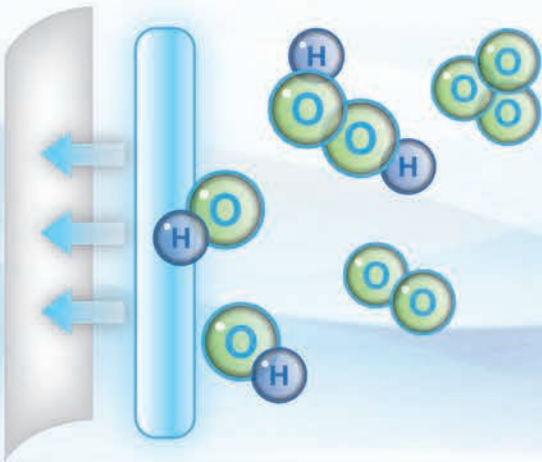

Sanitize large areas without taking up lots of space with our compact air purifiers.

AHPCO Technology

Replicating Nature and The Sun

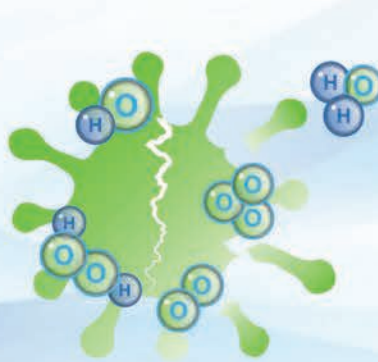

Step 1.

Ions are Created from UV Light

The **UVC lamp** destroys germs that pass by. Redundant air-cleansing ions are then formed from water vapor when rays of light from the **UVC lamp** excite the **AHPCO Catalyst**.

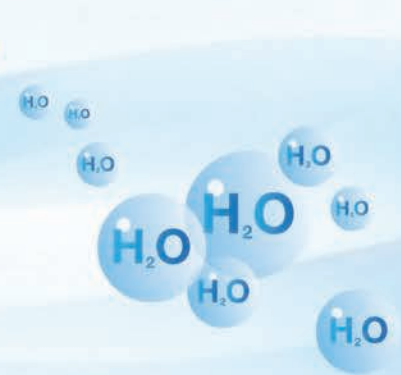

Step 2.

Bacteria, Viruses, VOCs & Other Pollutants are Destroyed

Redundant ions **actively** seek out pollutants and break them down. They are neutralized as the contaminants are destroyed.

Step 3.

Harmless By-products of Water Vapor

Ions revert back to harmless water vapor and the cycle repeats, thereby reducing additional contaminants.

Bi-Polar Ionization

Bringing Mother Nature Indoors

Step 1.

Positive & Negative Ions are Dispersed

Positive and negative ions are created by splitting water vapor present in the air. Our purifiers are **proactively** dispersing ions throughout the ambient air.

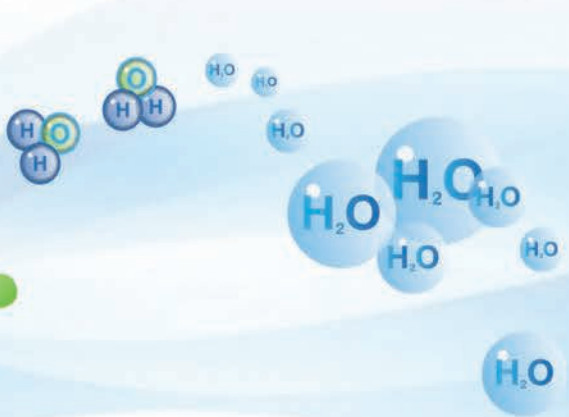

Step 2.

Bacteria, Viruses, VOCs & Other Pollutants are Destroyed

Polarized ions **actively** seek out pollutants and break them down. They are neutralized as the contaminants are destroyed. A clustering effect causes contaminants to become heavy and drop out of the air.

Step 3.

Harmless By-products of Water Vapor

Polarized ions revert back to harmless water vapor and the cycle repeats, thereby reducing additional contaminants.

How it Works

This large room air purifier utilizes 2 cutting-edge technologies, one originally developed by NASA and the other originally invented by renowned scientist Albert Einstein in the early 1900's & enhanced by Air Oasis, to destroy carbon-based molecules that pollute the air and create odors. These carbon-based molecules include things like smoke, mold, bacteria, and airborne viruses. As a photo-catalytic air purifier, it uses a UV lamp to convert the carbon-based molecules into harmless molecules, like carbon dioxide and water vapor.

Cutting Edge Technologies

Although this tower air purifier uses advanced technology to improve Indoor Air Quality (IAQ), it is easy to use and requires virtually no maintenance. The purifier has a single switch to operate, eliminating complicated settings. Additionally, there are no filters to clean or change, which makes it practically maintenance-free. The only maintenance involved is to change the AHCPO cell every three years when an alarm alerts the user that the cell needs to be replaced. Because the purifier doesn't use a filter system, it requires less electricity, making it more energy-efficient.

The Air Oasis 3000 G3 is also equipped with our latest Bi-Polar® Ionization Technology, making it the perfect purifier, using 2 very effective technologies to rid your home or office of unwanted germs and bacteria.

While many air purifiers are noisy and bothersome, this purifier is quiet and discreet, making it perfect for both residential and commercial spaces. The subtle design keeps it from creating an eyesore in the room, and the six-foot power adapter cord means that the user isn't at the mercy of outlet placement in the room. The Air Oasis 3000 G3 is made in the U.S. and has a three-year warranty.

Additional Benefits

Many homes and offices will benefit from using a tower air purifier in spacious areas because it can quickly and safely get rid of allergens in the air. Inhabitants breathe in contaminants from smoke, mold, bacteria, and viruses if the air isn't purified. Not only will the user be able to breathe easier knowing that the air around them is clean, but using a large room air purifier will eliminate any unpleasant odors that come from pets, cleaning chemicals, smoke, mold, and more.

The purifier can help to clean the air in expansive spaces up to 3,000 square feet. This is perfect for large office areas, large living spaces, homes with open floor plans, and even spaces smaller than 3,000 square feet that have high contaminant levels. It provides an easy, efficient way to purify the air in large spaces in only a few minutes. Because the Air Oasis 3000 G3 is a photocatalytic air purifier, it uses less electricity than most purifiers and devices, making it extremely energy-efficient for your home or office space.

The Air Oasis 3000 G3 is the best purchase for those who wish to decontaminate the air in any large space that people live or work in. If you need a strong purifier for the car, a hotel, or mobile home, check out our Air Sanifiers® for a purifier that works on the go.

Features

Simple Operation: The Air Oasis 3000 G3 is simple to operate. The device turns on with the flip of a single switch. There are no complicated multiple settings to learn.

Virtually Maintenance Free:

- No routine maintenance to perform
- No filters to change or clean
- Audible alarm indicates when it's time to replace the AHPCO Cell (AHPCO Cell only needs replacing every three years)

Power Source:

- 12VDC wall adapter (can be used overseas)
- Meets domestic and international standards

Coverage: Up to 3000 sq. ft.*

(*Multiple units may be needed in areas of higher contamination)

Noise:

- Whisper quiet operation

Low Maintenance:

Zero maintenance for 3 years.

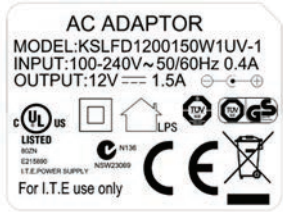

Durable Construction:

- 1/8" thick brushed metal housing, not a faux finish
- Internal metal components ensure long term use
- Made in the USA

Warranty:

- 3 year warranty

Product Specifications

Product Name:	Air Oasis 3000G3	
Model Number:	AO3000G3	
UPC:	854663003027	
Product Dimensions:	Not Packaged: 4" x 4" x 15.5"	Packaged: 19" x 11" x 5"
Weight:	Not Packaged: 4 lbs.	Packaged: 6 lbs.
Electrical Specs:	12 VDC, 15 Watts	
Power Adapter:	6 foot cord Meets domestic and international standards. See label to the right.	 <p>AC ADAPTOR MODEL:KSLFD1200150W1UV-1 INPUT:100-240V~50/60Hz 0.4A OUTPUT:12V --- 1.5A</p> <p>UL LISTED N136 NOM2009 For I.T.E use only</p>
Airflow:	11 CFM	
Square Foot Coverage:	3000 sq. ft. (multiple units may be needed in areas of higher contamination)	
Settings:	ON/OFF	
Materials:	aluminum and polymers	
Working Temp:	0°-122°F	
Warranty:	3 year limited	
Replacement Parts:	3 year replacement AHPCO Cell Model Number: AHPCO-5-G3	
Country of Origin:	Made in the USA
