

The Commercial Series

Simple, Elegant, Commercial Air & Surface Purifiers

Single-room air purifiers with three technologies to eliminate contaminants.

3000XG3: Intended for use in hotels, salons, pet clinics, fitness centers, and locker rooms. Scientifically tested to address up to 99% of contaminants such as allergens, mold, odors, viruses, bacteria, and VOCs. Simply turn it on and enjoy clean air and sanitized surfaces.

5000PRO: This commercial air purifier quietly and effectively reduces up to 99% of allergens, odors, mold, viruses, bacteria, and VOCs with proprietary Air Oasis filterless technologies. No complicated controls. Turn it on, breathe fresh air, and enjoy sanitized surfaces.

Commercial Series Benefits

Allergy Relief

Airborne dust, dander and pollen won't keep you down or rob you of a good night's rest. Reduces airborne allergens up to 99%.

VOC and Odor Control

Say goodbye to unwanted odors and stale air. Breathe fresh healthy air. Reduces odors and VOCs up to 99%.

Clean Air & Surfaces

The 3000XG3 & 5000PRO Commercial technology significantly reduces mold, viruses, and bacteria in the air and on surfaces by 99%.

Simple Yet Effective

An inconspicuous yet powerful tool to ensure safe, healthy businesses.

The 5000PRO air purifier and surface sanitizer delivers a powerful punch to unwanted contaminants.

Hotel and restaurant staff use to eliminate -- not just mask -- unwanted smoke or other odors. And it's effective at ridding locker rooms and pet kennels persistent odors.

The Commercial Series

Simple, Elegant, Commercial Air & Surface Purifiers

Scientifically Backed

From tough odors to resilient bacteria, Air Oasis is pioneering leading technology solutions.

Using three technologies experimented with by Einstein and NASA -- the 3000XG3 & 5000PRO effectively and safely remove unwanted contaminants such as allergens, mold, mycotoxins, bacteria, viruses, VOCs and odors.

"I know of no other technology available that produces the high level of pathogen abatement as AIR OASIS air purification units." ~Professor N. Ghosh, Ph.D., MAAAAI

Three Powerful Technologies

The 3000XG3 & 5000PRO turn water vapor into decontaminating ions.

NASA initially researched PCO; we refined that technology with our proprietary AHPCO with germicidal UVC.

We then added bi-polar ionization that releases a balance of both positive and negative ions. Together, the ions emitted travel throughout the air and are highly effective at ridding air and surfaces of unwanted contaminants. Mold, mycotoxins viruses, bacteria, odors, VOCs, and allergens are reduced to trace levels.

Beating Mold-related Issues

Protect your guests using a product that's truly effective.

While mold is a naturally occurring fungus with valuable properties in nature, we don't want it in our businesses. Whether you or your customers are battling nuisance surface mold or dealing with chronic mold-related allergies, our technology has reduced mold up to 99% in laboratory studies.
