

The G3 Series

Simple, Elegant Air & Surface Purifiers

Single-room air purifiers with three technologies to eliminate contaminants.

These filterless air purifiers quietly and effectively reduce up to 99% of allergens, odors, mold, mycotoxins, VOCs and germs. They use NASA developed AHPCO® technology and Bi-Polar® ionization to breakdown pollutants on a molecular level.

1000G3 for small and medium rooms
3000G3 for larger indoor spaces

G3 Series Benefits

Allergy Relief

Airborne dust, dander and pollen won't keep you down or rob you of a good night's rest. Reduces airborne allergens up to 99%.

VOC and Odor Control

Say goodbye to unwanted odors and stale air. Breathe fresh healthy air. Reduces odors and VOCs up to 99%.

Clean Air & Surfaces

The G3 Series technology significantly reduces mold, viruses, and bacteria in the air and on surfaces by 99%.

Simple Yet Effective

Elegantly designed to be an inconspicuous element of your healthy lifestyle.

The 1000G3 and 3000G3 air purifier and surface sanitizers blend in nicely with household décor. And they deliver a powerful punch to unwanted contaminants.

Using three technologies experimented with by Einstein and NASA -- the G3 Series purifiers effectively and safely address unwanted contaminants such as allergens, mold, mycotoxins, bacteria, viruses, VOCs and odors.

The G3 Series

Simple, Elegant Air & Surface Purifiers

Three Powerful Technologies

The 1000G3 & 3000G3 turn water vapor into decontaminating ions.

Widely used in schools, businesses, hospitals and government agencies, this technology is also available for your personal home and office use. NASA initially researched PCO. We advanced that technology with our proprietary AHPCO® with germicidal UVC.

We then added bi-polar ionization. Together, the ions emitted travel throughout the air and are highly effective at ridding air and surfaces of unwanted contaminants. Mold, viruses, bacteria, odors, VOCs, and allergens are reduced to trace levels.

Proven Technology

From the toughest odors to the most resilient bacteria, Air Oasis is pioneering the leading technology solutions.

“I know of no other technology available that produces the high level of pathogen abatement as AIR OASIS air purification units.” ~Professor N. Ghosh, Ph.D., MAAAAI

Sampling of test results: all reductions up to 99% H1N1: 99% Legionella pneumophila: 99% Aeroallergens: 99% Mold: 99% Bacteria: 99% Viruses: 99% Formaldehyde: 99%

Microflora & Propagules Reduction Study: Almost complete reduction of microflora and propagules at 5 distances.

Beating Mold-related Issues

Physicians treating mold-related illnesses purchase our products in support of their patients.

While mold is a naturally occurring fungus with valuable properties in nature, we don't want it in our homes or offices. Whether you're battling nuisance surface mold in your bathroom or dealing with chronic mold-related allergies, our products have reduced mold up to 99% in laboratory studies.
