

iAdaptAir®

The five absolute best air purification technologies in one smart air purifier.

The five absolute best air purification technologies in one smart air purifier.

iAdaptAir® is the smartest home air purifier. Experience full spectrum air purification for optimal indoor air quality. The iAdaptAir® high-quality HEPA, carbon, UV, AHPCO® and Bi-Polar® technologies eliminate pollutants, allowing you and your family to breathe easy year-round. Manage multiple air purifiers with the Air Oasis indoor air quality phone app. iAdaptAir® comes in three sizes.

Available in three sizes:

S

(Up to 250 Sq Ft)

M

(Up to 550 Sq Ft)

L

(Up to 850 Sq Ft)

Why iAdaptAir®

Get Allergy Relief

Reduce allergens by up to 99%, trapping pollen, dust, dander and smoke.

Eliminate Odors

Absorb even the toughest odors (including smoke) up to 99% and reduce VOC levels.

Clean Air & Surfaces

Reduce the flu virus and other illnesses with technologies that get rid of germs in the air and on surfaces.

Cost-effective

Designed to add value, the iAdaptAir® is an investment in your health.

Smart mode enables an IAQ sensor to adjust fan speed and adapt to pollution levels to ensure you're breathing fresh air while extending filter life. An auto-off setting on the control panel optimize filter usage, extending filter cartridge life and reducing energy consumption. iAdaptAir® automatically determines the optimal time to replace its filter cartridge by constantly measuring pollutant levels, fan speed and run time. The iAdaptAir® purifier only uses 12-48 Watts of electricity.

iAdaptAir®

The five absolute best air purification technologies in one smart air purifier.

Dust Guard

The washable dust guard removes large particles to help extend the life of the HEPA filter.

Advanced True HEPA Filter

Removes smoke, dust, pollen, dander and other allergy-causing particulates as small as 0.3 microns.

Mass Absorption Carbon Filter

Carbon air filtration has been used for more than a century to absorb vapors, odors and volatile organic compounds.

AHPCO™ Filter

Destroys tiny mycotoxins, mold, bacteria, viruses and VOCs that survive the HEPA and carbon filter stages of iAdaptAir®.

UVGI (UV Germicidal Light)

Sterilizes biological contaminants such as mold, bacteria, and viruses.

Bi-Polar® Ionization

Creates positive & negative ions which seek out and reduce contaminants such as particulates, mold, bacteria, viruses and VOCs on a molecular level both in the air and on surfaces.

Stay Connected

Monitor your iAdaptAir® purifier with a built-in smart control panel or remotely via a mobile app.

Download our mobile app and control multiple purifiers anywhere in the world. The app scheduler sets the time iAdaptAir® turns on and off each day. The smart control panel allows you to adjust fan speed, put on the child lock, turn the lights off for restful sleep. It will even display the current air quality surrounding your iAdaptAir® so you can regulate the settings before returning home. Use iAdaptAir® with or without Wifi connectivity.

Doctor Recommended

Industry experts acknowledge our products help people breathe easier and feel better.

Third-party lab tested to reduce up to 99.99% of H1N1 Influenza virus, bacteria, mold, mycotoxins, and VOCs in 20 minutes or less.

Recommended for use by physicians across the United States to reduce allergy causing pollutants and for patients suffering from the effects of chronic hypersensitivities to mold, chemicals and mycotoxins.
